

Notes for use of environmental values (EVA) for waters in the Upper Dawson main channel (above Hutton Creek) and Western Upland tributaries subcatchments shown on this map:

- The EVs shown in particular subcatchments on the map are specific to developed areas in each subcatchment. EVs for undeveloped areas are common across all subcatchments and are shown below.
- The groundwater EVs shown below apply to all groundwaters covered by the scheduling document.

Undeveloped areas

GROUNDWATERS

Shallow (windmill bores)

Precipice sandstone

Coal seam gas layer

Hutton sandstone (Injune)

Notes for use of environmental values (EVA) for waters in the Upper Dawson main channel (below Hutton Creek), and Northern Upland, Central and Southern tributaries subcatchments shown on this map:

- The EVs shown in particular subcatchments on the map are specific to developed areas in each subcatchment. EVs for undeveloped areas are common across all subcatchments and are shown below.
- The groundwater EVs shown below apply to all groundwaters covered by the scheduling document.

Undeveloped areas

Groundwaters

Legend

- Town
- Dam / weir / barrage
- River / creek
- Subcatchment boundary
- Boundary of waters covered by the scheduling document
- Local government boundary

Management Intent for Waters

- High ecological value fresh waters (maintain)
- High ecological value fresh waters (achieve)

Water Types

Fresh waters

- Upper Dawson River catchment fresh waters
- Lower Dawson River catchment fresh waters
- Comet River catchment fresh waters
- Callide Creek catchment fresh waters
- Wetlands (palustrine)
- Lakes / reservoirs

Key to Environmental Values

Aquatic Ecosystems, Irrigation, Farm Supply, Stock Water, Aquaculture, Human Consumption, Primary Recreation, Drinking Water, Industrial Use, Cultural & Spiritual Values, Visual Recreation

Notes:

- For areas outside of the waters covered by the scheduling document please refer to the relevant plan.
- Waterways in the catchment that are not shown on this map as having a management intent of high ecological values (maintain or achieve) have a management intent of moderately disturbed.
- Refer to plan WQ1310 for mapping of groundwater chemistry zones.
- Wetlands shown on this map are sourced from the Queensland Wetland Data Version 2.0 developed by the Queensland Wetlands Program. Refer to the WetlandInfo website (www.ehp.qld.gov.au) for the most current information on Queensland wetlands.
