I HAVE ATTACHED ADDITIONAL DETAILS FOR THIS SECTION.

Assessment of the environmental impact

Holder: Darrell Warren Skennar

Permit number: EA0001508

Background

EA0001508 currently covers ML 100095, ML100220, ML100232 which are not currently being worked. This application is to add ML 100360 to the existing EA.

Q 22 - Environmental values

A description of the environmental values likely to be affected by each relevant activity

Water

ML 100360 is applied for over an existing camp location. The addition of the permit to the EA does not take any additional water resources or affect surface water. No processing will occur on this lease.

Ground Water

ML 100360 is applied for over an existing camp location. The addition of the permit to the EA does not take any additional water resources or affect ground water. No processing will occur on this lease.

Wetlands

ML 100360 is not located near to any wetlands.

Land and Land Use

The camp area being covered by the application for ML 100360 already exists with Landholders consent. The surface area of the Land will become the "property" of the mining lease applicant upon grant for the duration of tenure. This permit is not anticipated to have any adverse impacts on the land or the environment surrounding the tenure.

Acoustic

Solar power is the predominant power used in camp. On occasion a generator may be used a night for a couple of hours. No processing is occurring on this permit so very little impact to the acoustics in the surrounding area are anticipated.

Assessment of the environmental impact

Air

No impacts to air quality are anticipated with this application.

Waste

Waste generated on ML 100360 will be domestic in nature and disposed of in accordance with the standard conditions for mining lease activities.

Details of any emissions or releases likely to be generated by each relevant activity

No emissions or releases are anticipated with the addition of this tenure.

A description of the risk and likely magnitude of impacts on the environmental values

The environmental values of the area will not be adversely affected by the addition of the mining lease application.

Details of the management practices proposed to be implemented to prevent or minimise adverse impacts

This amendment for the addition of tenure to cover the existing camp. The Landholder advises their intention to retain the camp post mining as an outpost. No additional management practices are required.

Details of how the land subject of the application will be rehabilitated after each relevant activity ceases

General rehabilitation within the permit area will be carried out but the intention is for the infrastructure to be retained by the Landholder so current buildings will remain.
